COURSE DESCRIPTIONS:

Chess Wizards

Let's Play! Let your child be a part of one of the most successful chess academies in the country. Chess Wizards teaches the game of kings in a unique, fun, and engaging way. Kids will learn everything from basic piece movement to advanced tactics, with lessons tailored to suit students of all skill levels. Participants will receive a trophy and a folder containing all of the puzzles they complete throughout the course.

Instructor: Chess Wizards

Kidz Clay! (Ceramics)

Experience the magic of clay! In this hands-on class, we explore the handbuilding techniques of coil, pinch and slab in exciting projects that nurture children's creativity. Every week, students will create pieces such as animals, masks, houses, and more! These projects make great bases for children's personal visions, and allow them to play with art concepts including symmetry, texture, and patterns.

Children will build their own clay stamps and learn how to find unique tools in everyday life, while developing strength and precision in their most valuable clay tool... their hands! You'll be delighted at the creations your child will proudly bring back home!

Instructor: Claire Weber brings experience and passion in working with kids, with over 10 years experience in clay, both hand-building and pottery wheel, and 8 years making art and clay projects with elementary grade children. Clay is an amazing medium that feeds our sense of touch, tugs at our inner playfulness and boosts our creativity!

Earth, Wind, Inspire

Neither rain, nor sleet, nor snow will prevent us from having a great time in this session of Mad Science. We'll learn all about weather as we explore meteorology and clouds. Take a voyage to the center of the earth as we investigate how our planet formed and the forces that keep changing things. Discover how science is used to solve crimes, and take home your own I.D. kit. Learn all about pulleys, levers and catapults in Mad Science Machines and make your own Rocket Racer. Discover first-hand how movie special effects are created. Turn your kitchen into a virtual lab as you learn about the chemical reactions that take place there. Explore the science behind your favorite toys, as well as some that you

may not have played with, but your parents probably did. You won't want to miss a minute of this exciting series!

Instructor: Mad Science- Mad Science is the world leader in fun science for children. Mad Science conducts educational, entertaining, and hands on learning activities for elementary age children throughout the Bay Area. Our unique brand of exciting, interactive activities instills a clearer understanding of how science affects the world around them. Through Mad Science your child will be able to touch, hear, smell, and taste what science is really about.

Young Rembrandts

Young Rembrandts' lessons are fun, engaging, and educational. Students complete one new drawing each week and learn a variety of art concepts including: portraiture, still life, line and patterning, realism/abstract, perspective, color theory, and art vocabulary. We never repeat lessons so there's something new each week. With Young Rembrandts your student will "Discover the Power of Drawing!"

Instructor: Young Rembrandts

Future Enrichment Sessions Include:

Session 5: April 23, 2012 – June 1, 2012
